**YC Power Systems Provides a Custom
Solution for Meadowbrook's Senior
Living Community**

Application Background: A new assisted living facility was being designed within an existing senior living community in Escondido, CA. As a part of the design, a portion of the new facility would be designated for extended care residents. As a result, emergency backup power was now required by code. This drove the facility to look into different options, including a backup generator. The use of a generator would not only meet the facility code requirements, but could also be utilized to support a mix of the facility's essential loads as well.
